EVENTS

SEATING & INFRASTRUCTURE

Bring your event *to life!*

| Grandstands, Terraces, Crowd Control & Bespoke Trussing

| We'll provide everything you need to get your event off the ground

Specialist supplier for outdoor events, festivals, exhibitions, sporting events & concerts

We are one of the UK's leading suppliers of event seating and infrastructure equipment, specialising in a wide array of products including 37,000 temporary grandstand seats available for hire.

From initial consultation through to completion of contract, our experienced events team of design engineers, project managers and on-site crews are committed to delivering quality bespoke event solutions.

We will help to identify exactly what you need to make your event a success and then proceed to deliver your requirements effectively and efficiently.

No other supplier can match us for expertise and broad product range for the events industry.

"I would like to thank you and your team for all the effort, hard work and support put into building the show and creating such an incredible event"

Horse of the Year Show

Tiered Grandstand Seating

From the modest to the truly magnificent

Our extensive and versatile range of tiered grandstand seating systems means that we have the right product whatever your requirements. We have a wealth of experience across many sectors providing unique products specific to each of our customers. Our design team will be able to advise on what solution would be best suited to the event or venue, maximising use of available space to provide the desired capacity.

For access we are able to offer various options including front, rear or internal entry depending on site layout and movement requirements. Our design team will be able to provide evacuation calculations as part of the project proposal to ensure that health & safety requirements are met.

We provide:

- Seating compatible with both indoor and outdoor applications
- Disabled viewing and access can be integrated into any of our structures
- Flexible structures for installation on uneven ground
- Curved splay configurations
- Extensive legroom for extra comfort
- A choice of rise height, with options for change of rake
- First row available at ground level or raised
- Full service for numbering & lettering
- In-house CAD design team to ensure perfect configuration
- Free site surveys

Covered Grandstand Seating

Protect your spectators from the elements

In situations where protection from the elements is required we can offer covered grandstand seating. Offered with either a 6 or 12 row span our roofing system is compatible with any of our 'row rise' options regardless of whether the grandstand is raised or at ground level.

We have developed our own unique roofing system, which has been designed with ease of installation in mind. The main supporting columns are fixed into specially designed rotating base plates allowing installation of the roof structure to be undertaken whilst keeping working at height to a minimum. Always taking a safety first approach, our design team will ensure that wind speed and ground anchoring have been taken into account, and will be able to provide structural calculations for loadings and uplift.

We can also offer:

- Gable and rear wall sheets to provide additional protection from the side and rear
- Guttering and drainage
- Integrated trussing to provide fixing for audio visual equipment and lighting

Temporary Seating for Conference & VIP

Cushioned seating for extra comfort

Upholstered and cushioned seating for conferencing or VIP applications can be offered where audience comfort is paramount. These temporary seating options are fully compatible with all of our seating systems and can therefore be offered in either tiered or flat-floor configurations. Whilst these seats are most popular for indoor venues such as arenas, it is also possible to offer these with outdoor covered grandstands.

To improve the aesthetics of our temporary seating we are also able to offer carpeting in almost any colour with the option of only covering the main aisles, or fully carpeting the whole structure. Drapes can also be utilised to cover hand railing and under-structure to further enhance their appearance. Cladding can also be quoted for and can be painted in almost any colour.

Features:

- Upholstered and cushioned seating
- Tiered seats or flat-floor options
- Fully carpeted or just aisles
- Drapes and cladding options

The British Soap Awards

Flat-Floor Seating

Efficient, cost effective seating

Our flat-floor seating is the perfect solution for indoor and outdoor venues where a cost-effective, 'rigid' seating configuration is required. Utilising floor bars, our tip-up seats can be arranged in flat-floor configuration making far more efficient use of event space than traditional seating.

Since this system only involves utilising floor bars and seating racks there is far less equipment and labour required in achieving the desired capacity in comparison to a tiered solution. This is therefore a perfect option when cost or build time restraints are challenges facing an event.

Options Include:

- Cushioned or upholstered options
- Installation on raised platforms
- Can be used in conjunction with tiered seating to create an arena or auditorium.

Terracing & Grandstand Customisations

“Wernick have supplied grandstands and other facilities at Cheltenham for many years and have consistently delivered an excellent service”

Cheltenham Gold Cup

Terracing

Standing terraces are the most efficient way of providing clear viewing of a stage or activity for your spectators as it is possible to fit more people per square metre of decking than with tiered seating.

Features:

- First row raised or at ground level
- Various access options including access for disabled persons
- Compatible with our seating systems
- Roof coverings available
- Splay configuration available
- Finishing options including netting, drapes, carpeting or cladding.

Grandstand Customisations

We have a number of bespoke products to enhance the customer experience of our grandstands and are willing to explore any new ideas on your behalf.

Examples:

- Bars and hospitality areas
- Flagpoles
- Walkway Tunnels
- LED Screens
- Vinyl branding

Staging, Stairways & Access

Staging

We have a modular decking system perfect for use for both indoor and outdoor stages. The component-based under-structure allows for complete flexibility of stage height with various access solutions available depending on site requirements.

Staging can also include:

- Carpeting
- Draping
- Branding
- Trussing for audio visual equipment

Disabled Ramps

To compliment our stairway systems and to provide access solutions for disabled persons we can also offer DDA compliant ramps.

Features:

- DDA compliant
- Safety hand railing
- Sturdy design
- Flexible system to suit site requirements

Temporary Stairways

Our versatile stairway system offers a quality solution to most requirements. We can offer anything from basic single stairways, to sophisticated access solutions.

Indoor & outdoor stairway applications include:

- Grandstand seating access
- Stairways for staging and viewing platforms
- External access for temporary structures
- Additional fire escape for either permanent or temporary building/structure

Viewing & Camera Platforms

Our decking and access systems can be configured to provide viewing or camera platforms.

Features:

- Sturdy design for minimal vibration
- Various access options
- Safety hand railing
- Reinforced decking for heavy equipment

Fencing & Crowd Control Barriers

We provide a full compliment of fencing & crowd control products

All of our fencing stock is available either for dry-hire, or as part of a fully installed service.

"Wernick's experience, assistance and hands on approach on the day contributed significantly to the smooth running of the event. A great team effort. Thanks to Wernick"

Northampton Borough Council, Olympic Torch Relay

GS7 Fencing

Each of our GS7 fence panels are anti-climb in design, and sturdy for effective control of large crowds. Base units are heavy duty plastic to minimise the chance of being blown down or pushed over.

Features:

- Panel dimensions 3.5 x 2m
- Stabilisers, pins, blocktrays available
- Vehicle & pedestrian gates

Crowd Control Barriers

Our crowd control barriers can turn your open grounds into a well-designed and carefully constructed layout of different channels and paths to create a better visitor experience.

Features:

- Available in 2.3m or 2.5m lengths
- Fixed leg, or loose leg options
- Lightweight in design

Front of Stage Barriers

Front of stage barriers are an essential part of any production assisting with crowd control and keeping attendees away from performance areas.

Features:

- 1m sections
- Corner sections and gates available
- Lightweight in design

Trussing Structures & Time Clocks

Everything you need for a successful event from a single supplier

"Please pass on to the whole team how grateful I was to have them there all weekend. There were lots of CRUK staff on site over the weekend including directors and they all commented on how fab Wernick and the boys were"

Cancer Research UK, Pretty Muddy Reading

Trussing

We have a large stock of trussing available for hire for both indoor and outdoor applications. This high quality, lightweight system is easy to install and dismantle which means our experienced crews are able to build within the strictest of event schedules.

Time Clocks

Time clocks are available for use on many sporting events and designed to fit with our gantries or independent stands. The clocks provided are lightweight and battery operated, so you won't require a connection to a mains power supply and can utilise the clocks in many different ways and locations according to your requirements.

Features:

With a large choice of sizes, connectors and fixings, we are able to offer this product for use in a variety of applications including:

- Start/finish gantries for races
- Exhibition stands - ideal support for trade stands to fix lighting/ branding to.
- Signage and temporary screen support
- Light gantries - can be joined with our staging or grandstand roofing systems
