

# 2040 NET ZERO

## Milestones & key objectives

### 2022

- Scope 3 emissions identified by the CMP to start baseline measuring
- Wernick Group committed to the Pledge to Net Zero campaign, aligning our net zero target with the Science Based Targets Initiative's (SBTi) 1.5°C pathway
- Installed solar panels at our factory in York, generating enough energy to power 60% of the entire site
- Introduced plug-in hybrid electric vehicles into each grade within our company car policy

### 2026

- Successfully achieved SBTi validated targets

### 2027

- Install smart controls on all heating systems within our factories and workshops

### 2030

- All new company vehicles to be zero emission
- All gas / fossil fuel heating to be either removed or transitioned to a lower carbon source (workshops and factories)
- 50% of all existing office buildings to be energy positive A+ EPC
- Install 1 MW of solar capacity across our estate

### 2023

- All of our invoicing completed electronically, championing our ambition to be digital by default
- A total waste management service implemented across the Group
- Worked with academia to present a robust evidence base for the modular and portable sector to drive net zero performance improvements
- Installed smart sockets at our Head Office to reduce energy waste
- Voltage optimisation units fitted at the Wernick Buildings factory in Kenfig, South Wales

### 2024

- Increased solar generation capability across our estate to 417 kWp, generating 13% of our own renewable energy
- All offices and factories now fitted with low energy lighting
- All offices now have double glazed windows
- All company cars transitioned to plug-in hybrid electric vehicles

### 2025

- Single use transportation sheets to be abolished across Wernick Hire and Wernick AVDanzer
- All locations to have vehicle charging points
- All operations / offices to be paperless so far as reasonably practicable
- All Management Teams and location managers (e.g. Depot Managers) to have climate awareness training
- All future new build offices to be built energy positive EPC A+
- All new forklift trucks to be full electric or an alternative low / zero emission solution

### 2040

- All company premises, processes and operations to be net zero!
